Volume 6 Issue 9 September 2020 www.mgncre.org

"Being rooted in local language is key - The Education Ministry will make efforts to preserve and promote all Indian languages, including classical, tribal and endangered" - Union Cabinet Minister for Education, Dr. Ramesh Pokhriyal 'Nishank'

The National Education Policy 2020, brought out by the Government of India in August 2020 has paved the way for large scale, transformational reforms in both school and higher education sectors. **Prime Minister Shri Narendra Modi** has emphasized

three languages must be native languages of India. There is the scope for learning native languages of India, including Sanskrit. The New Education Policy has provision for Sanskrit to be offered at all

on 'jad and jag' analogy, reiterating the role of education in making children grounded in one's culture to make a mark in the world. The national policy has made an attempt to make all the different languages of India get equal footing. The policy leaves it to the States to decide which three languages they must offer to their students.

Two of the

levels. Sanskrit is not only the carrier of Indian culture but is a scientific language which hammers at the importance of sound, the base of all kinds of verbal communication. The sound of the alphabets, the connection of alphabets to structure words and the grammar are all methodically arranged in Sanskrit language. The study of Sanskrit will not only give a grip on all other languages in terms of oral communication but the rule-based grammar will promote logical thinking in young children.

"India will be promoted as a global study destination providing premium education at affordable costs. High performing Indian universities will be encouraged to set up campuses in other countries, and similarly, select universities will be facilitated to operate in India".

The 74th Independence Day Celebrations were a solemn affair across all states as the country grapples with the COVID 19 pandemic and the aftermath. **Chairman MGNCRE Dr W G Prasanna Kumar** in his

virtual address on the occasion called for nation building with emphasis on Swachhta, Rural Community Engagement and Nai Talim activities. "The National Education Policy will bring in a new quality education system that can transform the future challenges into opportunities, paving the way for a New India. Entrepreneurship will gain impetus as students get encouraged to freely choose their subjects according to their

interests and talents and delve in vocational subjects. They would have an opportunity to realise their potential. The future generations will not only be able to get employment on the strength of such abilities but will also create employment opportunities for others. As Mother tongue gets recognition, it will help strengthen young minds and make them progress rapidly.

Editor's Note

I extend warm wishes to my fellow countrymen on the occasion of India's 74th Independence Day! The current COVID 19 pandemic has curtailed all our celebrations but it has not dampened our spirit of endurance and perseverance. As we offer our gratitude to the numerous personalities who have made this day possible for us, we also look forward to the enormous nation building tasks ahead. **Resilience** is the word synonymous with MGNCRE. Amid the Corona Crisis, we also had to face several natural disasters which have rampaged some states. Amid such onslaughts of disasters, it is gratifying to see all sections of society coming together to help those in distress. We have learnt many lessons and are resurrecting ourselves. We have a lot to offer to the community and amid these scary times, our contribution to Community Engagement, Swachhta, Rural Management, Nai Talim, and Social Entrepreneurship assume all the more credence.

I am proud that we have achieved our mid year goals virtually. We have completed 300 Swachhta Action Plan

Workshops along with Faculty Development Programmes and Workshops on Vocational Education Nai Talim Experiential Learning (VENTEL), Social Entrepreneurship and Rural Community Engagement, and Rural Management.

As per the New Education Policy 2020, there is a need of faculty who can adapt to the rapidly evolving learning environment. MGNCRE is the forerunner for various path breaking activities including propelling Vocational Education (Productive Work with Economic Value) Nai Talim, and Experiential Learning (VENTEL) activities.

Gandhiji's Nai Talim Curriculum focuses on understanding the vision and philosophy of Experiential Learning through the skills and knowledge gained and impact on three Hs (Head, Heart and Hand) by participating in Vocational & Experiential Learning activities. The methodology helps in devising contextually suitable engagement activities for the student teacher; identifying aspects relevant to local community engagement in teacher education; and exploring models of art, craft for entrepreneurship and for self-reliance. Participants can reflect critically, modify perspectives on how experiential learning/work education will help make students lifelong learners. The

purpose of education is well realized through experiential learning. The guiding principle of Nai Talim is ***"Education and work cannot be separated and without work, research, contribution, creative and critical thinking skills, we cannot create new knowledge."***

MGNCRE has also given the call to form Social Entrepreneurship, Swachhta and Rural Engagement Cell Action Plan (SES REC) in Swachh Ranked Higher Educational Institutions.

The National Education Policy's emphasis on the Mother Tongue is a proud moment for all. We may learn any language or any number of languages. But the language of life, language of work and language of livelihood of millions is mother tongue. For the first time, since independence, India gets into respecting work and making work also as education. It has made people's language of work as the language of education. This is a hundred percent student oriented and student centric integrational National Policy on Education and is by far the most India focused and rural focused policy. It provides opportunities to learn work from class 6 and vocationalises education making our citizens job providers. It makes us march towards **Atmanirbhar Bharat** with great pride.

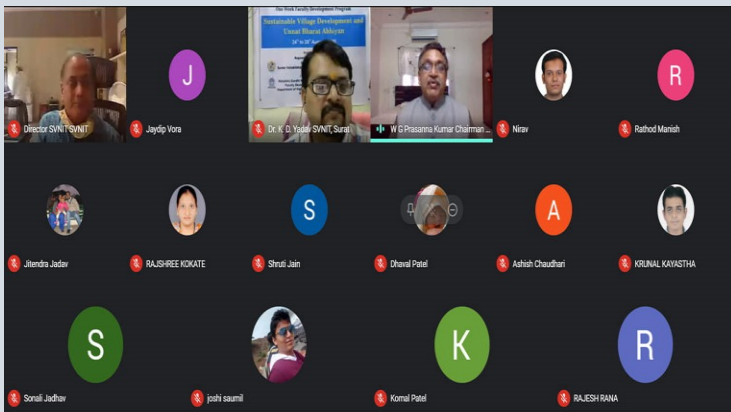

Dr. W G Prasanna Kumar
